\* NOTE: Our calories are given using the industry-standard Modified Atwater (i.e., Metabolizable Energy) equation, which assumes that pet food is 90% as digestible as human food. However, we believe that Evermore is a fully digestible food, and therefore feel that the Atwater calculation (i.e., gross calories, which is what the USDA uses to calculate human food calories) should be considered as well. These numbers are 1,394 kcal/kg., 632 kcal/lb., and 40 kcal/oz AS FED, and 5,507 kcal/kg., 2,498 kcal/lb., and 156 DRY MATTER.
